Key standards include: - AS 1562.1: Design and installation of metal roofing and wall cladding - AS/NZS 1170: Structural design actions, including wind loads relevant to roofing - National Construction Code (NCC): Encompasses building code requirements for all construction activities HB 39 Roofing Australia claims strict compliance with these standards, often citing adherence to AS 1562.1 for metal roofing installations, and following NCC guidelines for safety and environmental sustainability.

contractors, it faces the challenge of maintaining consistency across all projects.

Regulatory Challenges and Legal Considerations

Licensing and Liability Issues
