The Origin of the Phrase

Etymology and Historical Roots

The idiom's origin can be traced back to agricultural societies where turnips were a common crop. Turnips, a root vegetable, are known for their hardy, subterranean growth and their role as a food source in many European and Asian communities. They are a symbol of sustenance but, crucially, they do not produce blood or any other fluid that could be extracted.

The phrase's earliest recorded usage dates back to the 17th or 18th century in English literature, though similar expressions appear in other languages, reflecting a universal understanding of the impossibility of extracting something that does not exist.

Historical Context

1. In agrarian societies, farmers often relied on the metaphor of harvesting or extracting resources from their crops. Since turnips are root vegetables, they are seen as a symbol of something that can be "harvested" only if it contains something valuable or intended.
2. The phrase likely evolved from practical observations of farming and food preparation, where attempting to extract blood or other fluids from a turnip is obviously futile.

Literary Evidence

One of the earliest known usages appears in 18th-century English literature, where writers used the metaphor to describe the futility of certain endeavors, especially financial or emotional efforts directed at unyielding or unresponsive targets.
